

Northern Air Systems Touchscreen Controller

Since 1998, Northern Air Systems has been a leading provider of specialized cooling systems worldwide. With thousands of systems in operation today, we have the lowest downtime of any cooling system on the market. Northern Air Systems has developed an integrated cooling system for many different industries, and has been the trusted name for quality and dependability.

Description

The Northern Air touchscreen display is designed to make user interface with the HVAC microprocessor simpler and more intuitive. Available in numerous versions in terms of screen size (4.3", 7", 10" and 13") and level of connectivity (with or without Ethernet port). The touchscreen panel allows highly simple, intuitive and attractive interfaces to be developed, as well as simplifying human-machine interaction, making browsing the screens much easier.

Touchscreen Features

- Different screen sizes available
- Ability to control multiple units or zones from a single terminal or screen
- Customizable programming available
- Help and troubleshooting menus or guides available

If Your AC Has You Down, You're Not Using A Northern Air System!
